Builder Prompt Pack: 15 prompts for vibe coders (Bot Lodge)

Free to use and share. https://toolpicks.vercel.app

Planning

1. "Act as a product manager. Turn this idea into a one-page spec with the 3 core user stories: <idea>"
2. "What is the smallest version of this I could ship this weekend?"
3. "List the data tables this app needs, with fields and relationships."

Building

4. "Build only the first user story. Stop and show me how to test it."
5. "Explain what you just changed, file by file, in plain English."
6. "Refactor this file for readability without changing behavior. Add tests first."
7. "Add input validation and friendly error messages to every form."

Debugging

8. "Here is the error and what I did before it. List 3 likely causes, most likely first."
9. "Add logging that would have caught this bug."
10. "Write a failing test that reproduces this bug, then fix it."

Shipping

11. "Review this codebase for security issues: auth, secrets, injection, access control."
12. "Write the README: what it does, how to run it, environment variables."
13. "Generate SEO title, meta description and Open Graph tags for each page."

Growing

14. "Write 5 honest launch posts for X, each under 280 characters, no hype."
15. "Suggest 3 small features users would notice, ranked by effort vs. impact."
